🔗 Mazen Mohamed 🔗 Portfolio

Profile

Frontend Developer specializing in React, Next.js, and TypeScript, with hands-on experience building responsive and performant web applications. Experienced in API integration, authentication, state management, and modern frontend development practices.

Skills

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React.js, Next.js, Tailwind CSS
- **State & Routing:** Redux Toolkit, React Query, Context API, React Router
- **Tools & Services:** Git, GitHub, REST APIs, Supabase, Appwrite, Stripe

Projects

Movix - Movie & TV Discovery App 🔗

Tech Stack: Next.js, TypeScript, Tailwind CSS, TMDB API

- Built a responsive movie and TV discovery experience with search, filters, infinite scrolling, media details, trailers, cast, and recommendations.
- Integrated TMDB authentication with favorites and watchlists and optimized the application for strong loading and rendering performance.

GameHub - Game Discovery Platform 🔗

Tech Stack: Next.js, TypeScript, Tailwind CSS, Appwrite, RAWG API

- Built a responsive game discovery platform with search, filtering, pagination, genres, platforms, and detailed game pages.
- Implemented authentication, favorites, and wishlist functionality with Appwrite, using reusable components and performance-focused patterns.

E-Commerce Web App 🔗

Tech Stack: Next.js, Tailwind CSS, Supabase, Stripe, Auth.js, Framer Motion, Context API

- Built a responsive e-commerce application with product search and filtering, cart and wishlist management, and Google/credentials authentication.
- Integrated Supabase for backend services and Stripe for a complete checkout and secure payment workflow.

The Wild Oasis – Hotel Booking App 🔗

Tech Stack: React.js, Supabase, Tailwind CSS, Recharts, React Router

A modern hotel booking dashboard built with **React.js**, **Supabase**, and **Tailwind CSS**, featuring a sleek UI with **dark mode**, **authentication**, and complete **CRUD functionality** for bookings and cabins. Includes features like **check-in/check-out management**, **advanced filtering**, and **interactive data visualizations** using the **Recharts** library. Data is fetched using **React Router**, with a focus on usability and responsiveness.

Restaurant App 🔗

Tech Stack: React.js, Redux, Stripe, React Router, Tailwind CSS

- Built a responsive food ordering application with authentication, protected routes, menu search, and real-time cart management.
- Integrated Supabase for authentication and data persistence and Stripe for the checkout and online payment flow.

Education

Bachelor's Degree in Computer Science

Faculty of Science, Helwan University

09/2020 – 06/2024
